
PathWise and MasterControl Offer Intensive CAPA Training in Orange County

11/15/2009 – Salt Lake City, Utah – Earlier this month, representatives from PathWise and MasterControl presented a 2-day, intensive CAPA workshop in Newport Beach, CA. The event, held at the Bayview Marriott drew over 20 participants from more than 10 life science organizations, including Abbott Vascular, McKesson, Victus, Biomed and Meridian Life Science.

Course participants learned enhanced Corrective and Preventive Action techniques, including Issue Review, Root Cause Analysis, Implementation and Effectiveness Checking, gaining the tools necessary to identify and prioritize non-conformances, investigate root causes, and identify, implement and monitor corrective and preventive actions. The course focused on a “how-to” approach to meeting FDA quality system requirements. The instructors, Nathan Conover and Ken Peterson, presented a blended application of regulatory material and interactive exercises, including case studies and group exercises.

With nearly a 100% positive response rate from course attendees, the course was deemed to be a success. PathWise is planning to hold a similar event in southern California next year, with further training in the US and overseas.
